Albie Mark Salvador

Seasoned Project Manager | Software Developer | Network Administrator | Solutions Architect | Systems Support | Security Analyst

Competencies

- Project delivery & execution (Agile, Scrum, Waterfall)
- Stakeholder & client relationship management
- Project planning, budgeting & resource allocation
- Risk assessment & mitigation
- Change control & governance
- Cloud infrastructure (AWS, Azure, GCP)
- Data security & compliance (GDPR, PIPEDA, ISO 27001)
- Jira and Confluence
- Process optimization automation

Areas of Expertise

Technology Strategy Development: Designing governance models for technology solutions, such as enterprise transformation, systems migration and AI adoption

Data Security & Compliance: Expertise in creating safeguards for data systems

Cloud Infrastructure Leadership: AWS Solutions Architect with hybrid migration experience

Stakeholder Alignment: Translating technical capabilities into real world applications with business impact

Technology ROI: Ensuring solutions translate to efficiencies and bottom-line value

Agile Transformation: Leading cross-cultural teams in iterative solution development

Professional Experience

Tech Advisor — IntouchCX (Project Marshmallow)

Winnipeg, Canada — October 2025 – December 2025

Application Developer — IC Group Inc.

Winnipeg, Canada — August – October 2025

IT Consultant — Duque Immigration Consulting

Winnipeg, Canada — March 2025 – June 2025

- Led the delivery of a Next.js full stack web application, improving lead tracking efficiency by 30%

- Managed migration from WordPress to a scalable, custom web platform, ensuring business continuity and future growth
- Implemented AI-powered productivity tools and developed a multilingual chatbot for client support
- Oversaw project timelines, resource allocation, and stakeholder communications to ensure successful delivery

Security Analyst — CancerCare Manitoba

Winnipeg, Canada — Jan 2025 – May 2025

- Spearheaded the architecture and delivery of a Life Science Research Management Platform
- Developed and enforced ethical AI governance frameworks, ensuring compliance with Canadian and EU data standards
- Coached a cross-functional team in Scrum, accelerating deployment cycles through CI/CD optimization
- Managed project risks, change requests, and stakeholder reporting throughout the project lifecycle

Solution Architect/Developer – Digital Farm

August 2023 - December 2024 | Winnipeg, Manitoba

- Designed and developed a Digital Marketing SAAS Platform using generative AI
- Implemented full end to end DevOps CI/CD pipeline on Google Cloud using Kubernetes and Docker

Solutions Architect — Globe Telecom

2015–2023

- Directed a $5M B2B Enterprise Modernization Program, integrating AWS machine learning for predictive maintenance and reducing network downtime by 22%
- Led the delivery and migration of legacy systems to cloud infrastructure, achieving 99.95% uptime
- Managed the implementation of Salesforce Service Cloud and Microsoft Dynamics 365 for enterprise clients

IT Project Manager — Huawei Technologies

2011–2014

- Delivered SMART Telecom's VAS Transformation Project ahead of schedule, generating $1.2M in incremental revenue
- Designed and implemented fraud detection algorithms, reducing credit leakage by 18%

Industry Experience

Finance, Insurance, ATM/Switch, Mainframe, Shipping/Logistics, Maritime, Supply Chain, Telecom, eProcurement, Facilities Management, Payment Systems

---

Certifications

- AWS Cloud Architect (2023)

- Project Management Professional (PMP)
- TOGAF (Trained)

Education

Red River College Polytech (Exchange) — Advanced Diploma BIT - Information Security 2023 – 2025

University of the Philippines — College of Human Kinetics - Certificate in Sport Science 1988 - 1994
